

Complete Automatic Cover Tune-Up

Description

A complete automatic cover tune-up service which includes a multi-point inspection and recommended cover adjustments. Replacement of the normal wear items, if required, is advised at the time of inspection.

- Recommended Annually – ideally at the beginning of the season or whenever a cover exhibits performance issues such as not closing completely, misalignment, sluggishness, drag, or other performance issues.
- Service performed concurrent with pool opening does not have a service call charge at all.
- Can be performed at any time. Field service call charge is added, but discounted 50%.

Services Include

- Chemical deep clean and scrub of the pool cover.
- Cover pit clean, rinse and wet vac.
- Lubrication of cover drum bearings/ bushings (as equipped).
- Inspection of guides and glides.
- Inspection of ropes/cables.
- Inspection of pulleys, (track end and pit internal).
- Adjustment for parallel operation.
- Inspection/adjustment of wheeled guide assemblies, (if equipped).
- Advice of any replacement parts or additional services suggested.

Options

Services Included in quoted pricing for this service is outlined above.

- Replacement Parts, (if required) are not included in the price, but will be installed and provided as needed.
- Guide, glide and pulley replacements for many models made on site at same time.
- No service call or return trip charge for any backordered parts and associated installation. These repairs will be billed time on-site and material only.

Notes

- Any problems beyond normal wear items reported/quoted upon completion.

Availability

- Available in all North and Central American Markets.
