

Residential Spa Maintenance – Full Service

Description

- Complete residential spa maintenance service.

Services Include

Service performed each visit.

- Vacuum loose particles from spa bottom surface.
- Brushing of spa walls.
- Cleaning of the water line (tile line).
- Cleaning of skimmer basket.
- Test and adjust water chemistry, fill feeders, adjust feeders and automation as needed.
- Clean filter media as required.
- Operating review of all circulation equipment.
- Add make-up water as required (if automated or shut-off person is available).
- Wipe down cover.

Options

- Services options range from once a month to 7 days a week and can be paired with our system/chem check service.

Notes

- Bather load, surrounding environment (landscaping, etc.) and spa equipment may require additional days or owner involvement to assure quality water.
- Pricing is quoted as per visits as defined and billed the last calendar day of each month. Multiple visit/ week plans will show costs on a per-visit basis to allow for fractional weeks falling across month end dates.
- Technicians are available 24/7/365 through the customer care call center for emergency service.
- You will be notified immediately of any unsafe conditions.
- All water treatment supplies and chemicals are provided on an “as needed” basis and added to the regular monthly bill.
- Additional full service or system/chem check days can be added as needed.

Availability

- Available in all North and Central American Markets
