

## Spa Opening Service

### Description

Complete opening services for residential spas.

### Services Include

- Remove all winterizing plugs and equipment.
- Drain lines of anti-freeze.
- Re-assemble circulation equipment, inlets, skimmers, pump, filter, heater, chemical feeder.
- Clean walls and floor.
- Clean jets, pillows, and spa components.
- Clean skimmer basket.
- Clean filter compartment.
- Clean filter media as required.
- Clean and wipe down spa cover.
- Fill spa with fresh water.
- Test and adjust water chemistry, (chemicals sold separately).
- Fill and adjust feeders and automation as needed.
- Operational review of all circulation equipment.

### Options

- Deck power washing removes dirt, grime, mold and mildew, which can lead to slippery surfaces.

### Notes

- Technicians are available 24/7/365 for emergency service through our customer care call center.
- We will notify you immediately of any unsafe conditions or system malfunctions.
- All spa supplies and chemicals provided on an "as needed" basis and added to your bill.
- Domestic water (hose bib or equivalent) must be on and available to technicians at the time of service.

### Availability

- Available in all North and Central American markets.
