

Pool Maintenance - Full Service

Description

Complete full service maintenance for residential pool owners who prefer the hands-off approach to pool care.

Services Include

- Vacuuming of the pool bottom surface.
- Brushing of pool walls as required.
- Brushing and cleaning of the water line (tile line) as required.
- Cleaning of pump and skimmer baskets.
- Test and adjust water chemistry, (chemicals sold separately).
- Fill and adjust feeders and automation as needed.
- Backwash or clean filter media as required.
- Operating review of all pool circulation equipment.
- Start of make-up water as required (if automated or shut-off person is available).

Options

- Additional full-service or system chem check days can be added as needed – ideal for seasonal properties.
- Vacation plan services - provide peace of mind knowing your pool will be maintained while you are away.
- Heater cleaning, overhaul, or tune-up to eliminate any operational troubles throughout the season.
- Deck power washing removes dirt, grime, mold, and mildew, which can lead to slippery surfaces.
- Filter deep cleaning maintains water clarity and helps the system to work efficiently.

Notes

- Full-service maintenance options range from once a month to 7 days a week.
- **No** guarantee on water condition or chemistry between visits for customers with uncovered pools. Uncovered pools will collect debris constantly between visits.
- Customer involvement is required when Poolblu is **not** present to maintain clarity and cleanliness.
- Poolblu is not responsible for Extraordinary Events – both natural and man-made - Extra charges will apply.
 - Vandalism
 - Power Outages
 - Events of Nature - Severe weather, storm debris, animals
 - Neglectful use or operation – landscapers debris, behavior, etc.
- Technicians are available 24/7/365 for emergency service through our customer care call center.
- We will notify you immediately of any unsafe conditions or system malfunctions.
- All pool supplies and chemicals are provided on an “as needed” basis and added to your regular monthly bill.
- Pool bather load, covers, equipment usage, sunlight, temperature, and circulation time have a dramatic impact on chlorine consumption and usage. Poolblu can only adjust chemicals based on the current condition we find and cannot be responsible for changes between visits.
- All these services may not need to be performed in their entirety at each visit.
- It is the customers responsibility to inform Poolblu of the date of first and last service requested for the season.

Availability

- Available in all North and Central American markets.
