

# SAFETY DATA SHEET

According to 29 CFR 1910.1200 Hazard Communication Standard 2012 (HazCom 2012)

## SECTION 1: Identification

Draduat name		
Product name	DPD Powder	
Product number	R-0870; R-0870-PL	
Recommended use and restrictions	To be used in accordance with manufact manufacturer.	turer instructions or under the direct guidance of the
Manufacturer	Taylor Technologies, Inc. 31 Loveton Circle Sparks, MD 21152 Phone: (410) 472-4340 Emergency phone: (800) 837-8548	
CTION 2: Hazard(s) ider	ntification	
Physical hazards	Not applicable	
Health hazards	Eye damage/irritation	Category 2A
	Skin corrosion/irritation	Category 2
Environmental hazards	Not currently regulated by OSHA. For ad	Iditional information, refer to section 12 of the SDS
Hazard pictograms	$\mathbf{\Lambda}$	
Signal word	Warning	
	Warning Causes serious eye irritation. Causes ski	in irritation.
Signal word	Ŭ	in irritation.
Signal word Hazard statements	Causes serious eye irritation. Causes ski	g/eye protection/face protection if contact is likely t

## SECTION 3: Composition/information on ingredients

wixture			
Chemical name	Common name and synonyms	CAS number	% w/w
Sodium phosphate dibasic	Disodium hydrogen phosphate; Disodium phosphate	7558-79-4	10–30
Citric acid	2-Hydroxypropane-1,2,3-tricarboxylic acid	77-92-9	1–5
Ethylenediaminetetraacetic acid disodium salt dihydrate	EDTA disodium dihydrate	6381-92-6	1–5
N,N-Diethyl-p-phenylenediamine sulfate salt	DPD sulfate	6065-27-6	1–5
Nonhazardous and other components below reportable levels	Not applicable	Not applicable	45–70

## SECTION 4: First-aid measures

#### If inhaled

Remove individual to fresh air. Seek medical advice/attention if breathing becomes difficult or if respiratory irritation develops. Give oxygen or artificial respiration if needed.

#### In case of skin contact

Immediately flush skin with plenty of water for at least 20 minutes. If clothing comes in contact with the product, the clothing should be removed and laundered before reuse. Seek medical advice/attention if irritation develops.

#### In case of eye contact

Immediately flush eyes with plenty of water for at least 20 minutes. Remove contact lenses if present and easy to do. Continue rinsing. If symptoms persist or in all cases of concern, seek medical advice/attention.

#### If swallowed

Rinse mouth. Never give anything by mouth to a person who is unconscious or is having convulsions. Do NOT induce vomiting unless directed by physician. If vomiting occurs, keep head low so that stomach content does not get into the lungs. If symptoms persist or in all cases of concern, seek medical advice/attention.

#### Most important symptoms and effects, both acute and delayed

Refer to section 2 and/or section 11 of the SDS for the most important known symptoms and effects.

#### Indication of any immediate medical attention and special treatment needed

Provide general supportive measures and treat symptomatically.

#### General information

Ensure medical personnel are aware of the material(s) involved and take precautions to protect themselves.

## SECTION 5: Firefighting measures

Use extinguishing media appropriate for surrounding fire. Do not use a heavy water stream. Use of heavy stream of water may spread fire.
Not flammable
Not explosive
Hazardous reactions will not occur under normal conditions.
Calcium oxides, carbon oxides, nitrogen oxides, phosphorous oxides, potassium oxides, sodium oxides, sulfur oxides. Other irritating fumes and smoke.
Exercise caution when fighting any chemical fire; hazardous fumes will be present.
Use water spray or fog for cooling exposed containers.
Do not enter fire area without proper protective equipment, including respiratory protection.
Refer to section 9 of the SDS for flammability properties.

## SECTION 6: Accidental release measures

#### Personal precautions, protective equipment, and emergency procedures

Wear appropriate protective equipment and clothing during cleanup. Local authorities should be advised if significant spillages cannot be contained. For personal protective equipment, refer to section 8 of the SDS.

## **Environmental precautions**

Avoid discharge into drains, watercourses, or onto the ground.

#### Methods and material for containment and cleaning up

Dike the spilled material where this is possible. Stop leak if it can be done without risk. Absorb spillage to prevent material damage. Absorb in vermiculite, dry sand or earth, and place into containers. Prevent entry into waterways, sewers, basements, or confined areas. Following product recovery, flush area with water. Never return spills to original containers for reuse. Contaminated absorbent material may pose the same hazards as the spilled product. In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations.

#### **Reference to other sections**

For exposure controls and personal protection, refer to section 8 of the SDS. For waste disposal, refer to section 13 of the SDS.

#### SECTION 7: Handling and storage

## Personal precautions, protective equipment, and emergency procedures

Do not breathe dust or mists. Do not get in eyes, on skin, or on clothing. Do not taste or swallow. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. For personal protective equipment, refer to section 8 of the SDS. Keep away from incompatibles. Observe good industrial hygiene practices. Label containers appropriately.

#### Conditions for safe storage, including any incompatibilities

Keep tightly capped. Store out of direct sunlight between 36°F–85°F. Store away from incompatible materials (refer to section 10 of the SDS).

#### SECTION 8: Exposure controls/personal protection

#### **Occupational exposure limits**

#### US ACGIH Threshold Limit Values

Not regulated

#### US NIOSH: Pocket Guide to Chemical Hazards

Not regulated

#### US OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Not regulated

#### **Biological limit values**

No biological exposure limits noted for the ingredient(s)

#### Exposure controls

Appropriate engineering controlsGood general ventilation (typically 10 air changes per hour) should be used. Ventilation rates<br/>should be matched to conditions. If applicable, use process enclosures, local exhaust<br/>ventilation, or other engineering controls to maintain airborne levels below recommended<br/>exposure limits. If exposure limits have not been established, maintain airborne levels to an<br/>acceptable level. Eyewash facilities and emergency shower must be available when handling<br/>this product.Personal protective equipment<br/>Eye/face protectionWear appropriate chemical safety goggles if contact is likely to occur.Wear appropriate chemical-resistant gloves and clothing if contact is likely to occur.

Body protection Wear appropriate protective clothing if contact is likely to occur.

Respiratory protection In case of insufficient ventilation, wear suitable respiratory equipment. Use a NIOSH/MSHA approved respirator if there is a risk of exposure to dust/fumes at levels exceeding the exposure limits. Advice should be sought from respiratory protection suppliers.

## SECTION 9: Physical and chemical properties

#### Information on basic physical and chemical properties

Physical state	Solid
Form	Powder
Color	Off-white
Odor	Odorless
Odor threshold	No data available
рН	No data available
Evaporation rate	No data available
Melting point	No data available
Freezing point	No data available
Initial boiling point (boiling range)	No data available

Flach paint	No doto cusilable	
Flash point	No data available	
Specific gravity	No data available	
Auto-ignition temperature	No data available	
Decomposition temperature	No data available	
Flammability (solid, gas)	No data available	
Upper Flammability Limit	No data available	
Lower Flammability Limit	No data available	
Vapor pressure	No data available	
Vapor density	No data available	
Relative density	No data available	
Solubility	No data available	
Partition coefficient (n-octanol/water)	No data available	
Viscosity	No data available	
Explosive properties	No data available	
Oxidizing properties	No data available	
CTION 10: Stability and rea	octivity	
Reactivity	Hazardous reactions will not o	ccur under normal conditions.
Chemical stability	Stable under recommended ha	andling and storage conditions (refer to section 7 of the SDS)
Possibility of hazardous reactions	No dangerous reaction known	under conditions of normal use
Conditions to avoid	Contact with incompatible mat	erials. Do not use in areas without adequate ventilation.
Incompatible materials	Bases, brass, copper, iron, iro	n salts, nickel, nitrates, oxidizing agents, powdered metals, strong bases, strong oxidizing agents, strong reducing agents
	ZIIIC	
Hazardous decomposition		products under normal conditions
products	No hazardous decomposition	products under normal conditions
	No hazardous decomposition	products under normal conditions
products	No hazardous decomposition	products under normal conditions
